Residuals recomputed from saved 100-digit vectors; normalization diagnostics
Residual zeros display at -300; ploidy differences below 10⁻¹⁸ display at -18
seed138
seed101
seed174
log₁₀ saved-vector relative residual
log₁₀ double normalized relative residual
log₁₀ |high-precision ploidy change|
log₁₀ |clipping-induced ploidy change|
abnormal
ordinary control
oxygen neighbor
