

Fit-quality landscapes and optimizer diagnostics

A

Separate-fit objective landscapes

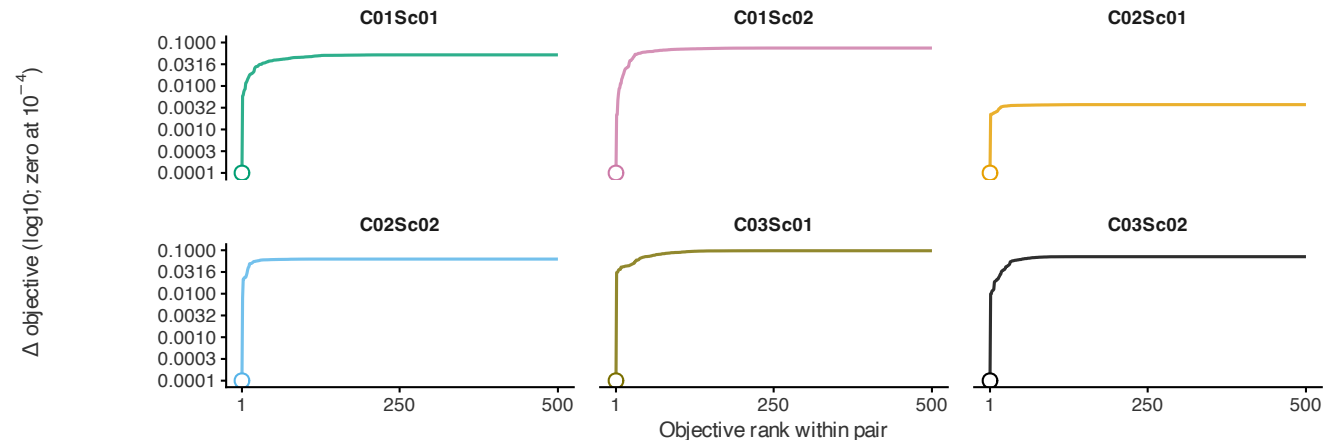

Log10 y-axis; exact zero is displayed at 10^{-4} . Selected fits are highlighted.

B

Joint-fit objective landscapes

Log10 y-axis; exact zero is displayed at 10^{-4} . Facets keep the six rank-1 selected winners distinct.

C

Optimizer diagnostics and solution multiplicity

Flags and optimizer codes are run diagnostics, not confidence intervals; none of these fits has bootstrap, profile-likelihood, or held-out uncertainty.

Separate in vitro	500	0 / 500	accepted; code 1	12 within 0.01	5 / 20
Separate in vivo	500	500 / 500	accepted; code 52	29 within 1% 241 within 5%	2 / 20
Joint: six pair runs	6 x 500	500 / 500 each	0 / 6 accepted	winner totals 18.85–19.98	2–4 / 20
