

Joint-fit numerical-search performance

A

Joint-fit objective landscapes

Three selected primary-family pairs, each with 500 numerical starts; the retained lowest objective is highlighted

B

Joint-search diagnostics by warm-start pair

Flags, codes, numerical-start spread, and bounds describe search behavior. They are not posterior uncertainty or biological replication.

C01	500	500/500	26–82/500	not accepted; code 52	500 $\leq$ 1% 500 $\leq$ 5%	2/20
C02	500	500/500	26–46/500	not accepted; code 52	500 $\leq$ 1% 500 $\leq$ 5%	2/20
C03	500	500/500	26–73/500	not accepted; code 52	500 $\leq$ 1% 500 $\leq$ 5%	2/20
